

DAAWN Digital Clinic

Offering employees peace of mind

In 2024 Birketts launched The Digital Family Clinic; an employee wellbeing initiative, which provides essential support and advice to employees with family-related issues – including divorce and separation, child arrangements, surrogacy and adoption, domestic abuse support as well as prenuptial and cohabitation agreements.

Receiving legal advice at an early stage can significantly improve how individuals approach their separation and divorce, while also supporting effective co-parenting.

However, employee access to legal advice – which is vital to reduce stress for individuals – remains very limited. Birketts want to help employers tackle this issue.
